Ergonomic Solutions is committed to ensuring the workplace is a safe environment with adequate space to carry the full range of work tasks.

It is widely recommended that flat panel monitors should have a good range of tilt and rotation adjustment to encourage the user to find the most comfortable working position for their individual needs.

The FP300 series provides a cost effective, wall and ceiling mounting option for flat panel monitors. Providing tilt and rotation the monitor can be presented to the operator in a manner that improves both comfort and productivity.

Other mounting options are available on request along with other colours, pole lengths and proprietary monitor mounts.

Please call us for a quotation.
